

L1L2-2GA & L1L2-2GP

L1/L2 Active Antenna & L1/L2 Passive Antenna

KEY FEATURES

- » Designed for military and civilian applications
- » L1/L2 Dual Band
- » Waterproof
- » Excellent LNA gain
- » Multiple Connector Options
- » Multiple Mounting Options
- » Multiple Color Options
- » Small Form Factor
- » Custom Gain Available
- » High Out-of-Band Rejection
- » BIT Technology (Passive)*

*Automated Built In Test (BIT)

The L1/L2 Passive Antenna includes BIT. The antenna can monitor the DC voltage on the center conductor to determine the status of the cable and antenna connection.

DURABLE, HI PRECISION, BUILT TO LAST

The L1/L2 Active and Passive GPS antennas from GPS Source are designed for long term reliability. The antennas are small and lightweight, with exceptional protection against the elements. Both are suitable for manpack, ground, marine, aircraft, and space applications, multiple GPS devices and operating platforms.

Designed to support the Warfighter, the portable, yet precise GPS L1/L2 antennas are built for tough applications. Their radome is made of high-grade polymer, with a design that prevents ice/snow buildup, protects antenna from UV, rain and lightning strikes, chemical and jet fuels.
